catoolRT 22.3 Release Notes

Changes since 21.12:

- Increase XCP crank angle time correction range from 10,000 to 1,000,000 microseconds
- Rename "DAQ Cycles" and "Stats Cycles" in "Configure Real-Time Analysis"
- When editing a channel allow an unknown type if initially unconfigured
- Rename "Frames Drawn" to "Frames Updated"
- Only display "Frames Updated" and "Display Delay" when online
- Fix issue after changing number of buffer cycles
- Fix issue with A2L files for CrankAngle event type
- Improve XCP CrankAngle timestamp calculation
