catoolRT 22.6 Release Notes

Changes since 22.3:

- Move to MSVC 2022 and wxWidgets 3.1.7
- Fix some display issues on Windows 11
- Speed up time to close down application
- Fix typo with "Cycle Buffer" in "Configure Real-Time Analysis"
- Hide unused items in "Format Plot" for scatter plots
- Scatter plots can now be hidden by setting marker type to "None" in "Format Plot"
- Scatter plot legend do not show any line and label text is same colour as marker
- Selected cursor is better aligned horizontally with the closest data point
- Fix crash when exiting application
- If a data source cannot be identified when loading a project it will default to the data acquisition data source
- Fixed a crash when increasing the clock resolution when it was a factor of the existing clock resolution
