catoolRT 23.3 Release Notes

Changes since 22.12:

- Properly support crank angle based digital input channels
- Fix potential crash in "Advanced Config"
- Update to wxWidgets 3.2.2.1
- Update to latest ETAS CAN API
- Only recommend NI DAQmx version 20.1 for Window 7/8.1 installations
- Fixes to prevent crashes during plotting of invalid diagrams
- Prevent some memory leaks during creation of add/edit channel dialogues
